

Work Item Type	Epic/User Story	MoSCoW	MoSCoW Rationale	T-Shirt Size (Estimate)
Epic 1	<b>Voice Recognition Software for Blind</b>	Must	Priority because addresses accessibility for a vulnerable group	
User Story 1	As a user I want to be able to have an accessible interface where I can easily understand what each button does by hearing it	Must	1. A blind person can run their hand on the app and hear where to tap 2. Must support common screen reader software 3. Easy to navigate with minimal learning curve	XL
User Story 2	As a blind user if I am struggling to navigate the app I would like to trigger the help function by talking and ask the question verbally	Must	1. Voice activation can recognise different accents and multiple languages and can be volume adjusted. 2. understands different questions.	XL
User Story 3	I want to be able to speak messages instead of type them.	Should	1. Able to understand accents to write messages. 2. Able to block out surrounding noise in order to understand message	L
User Story 4	I want to be able to ask the app to search for pictures/businesses/creators and then describe them to me so that I can also be included in	Must	1. Able to understand different commands and different ways of asking the different commands 2. Adapts to users voice over time	XL

	Aperture Creative Community			
<b>Epic 2</b>	<b>AI Generated Interface</b>	<b>Should</b>	Innovative and could lead to widespread improvements	
User Story 1	I want to be able to have a personally designed interface that I am confident meets all the latest trends	<b>Could</b>	<ol style="list-style-type: none"> <li>1. Able to generate different interfaces based on users descriptions</li> <li>2. consistent performance without significant bugs or errors</li> <li>3. Generates interfaces for web, mobile and desktop applications</li> </ol>	<b>M</b>
User Story 2	I want to have different options for uploading photos	<b>Could</b>	<ol style="list-style-type: none"> <li>1. Software automatically adjusts upload feature according to whether app is offline</li> <li>2. Upload can be done either by voice or by user clicking on a button placed in a location of their own personal choice</li> </ol>	<b>M</b>
<b>Epic 3</b>	<b>Filters</b>	<b>Could</b>	Enhancing an existing function rather than creating new essential	

			functionality	
User Story 1	I want to be able to easily import filters from other apps to include on Aperture	Could	<ol style="list-style-type: none"> <li>1.Import filter button to be easy to find (preferably on front screen)</li> <li>2. Allows import within 3 taps.</li> <li>3.Seamlessly connects to other software</li> </ol>	M
User Story 2	I want to be able to have lots of filters on aperture to choose from easily	Should	<ol style="list-style-type: none"> <li>1.Filter button is easy to see on the app (ideally front page).</li> <li>2.Filter options cover different types of filters for different types of photographs</li> <li>3. Filters should apply quickly without lag</li> </ol>	L

## PART 2

Work Item Type	Epic/User Story	MoSCoW	T-Shirt Size (Estimate)	Story Points (Estimate)	Justification (if descoped or not descoped)
Epic 1	<b>Voice Recognition Software for Blind</b>	Must			
User Story 1	As a user I want to be able to have an accessible interface where I can easily understand what each button does by hearing it	Must	XL	15	
User Story 2	As a blind user if I am struggling to navigate the app I would like to trigger the help function by talking and ask the question verbally	Must	XL	15	
User Story 3	I want to be able to speak messages instead of type them.	Should	L	10	

User Story 4	I want to be able to ask the app to search for pictures/businesses/creators and then describe them to me so that I can also be included in Aperture Creative Community	Must	XL	15	
<b>Epic 2</b>	<b>AI Generated Interface</b>	Should			
User Story 1	I want to be able to have a personally designed interface that I am confident meets all the latest trends	Could	M	5	This story isn't critical to the build based on its MoSCoW value and can be developed post MVP.
User Story 2	I want to have different options for uploading photos	Could	M	5	This story isn't critical to the build based on its MoSCoW value and can be developed post MVP.
<b>Epic 3</b>	<b>Filters</b>	Could			
User Story 1	I want to be able to easily import filters from other apps to include on Aperture	Could	M	5	

User Story 2	I want to be able to have lots of filters on aperture to choose from easily	Should	L	10	
--------------	-----------------------------------------------------------------------------	--------	---	----	--

Launch Date does not need to be moved

Rationale: The user stories asking for an AI generated interface could be developed post MVP which would save 10 story points and make up for the absent staff. AI generated Interface is a Could item from MOSCOW ranking and so can be developed at a later stage. The main emphasis at this stage was to cater for blind demographic and to address the filter issue that the CEO chose to prioritize.
